

Mathematics into School - Project Report

Tom Mann

March 27, 2025

Abstract

This report details a project delivered in partnership with Our Lady and St Thomas Catholic primary school with the aim of increasing girls' confidence in maths and decreasing cases of maths anxiety. Over a series of six sessions a group of girls were introduced to a variety of mathematical content. The pedagogical insight behind the mathematical content, design and delivery of these sessions will be examined. Finally the report will evaluate the success of the project in regards to confidence anxiety, along with the legacy to the students.
